

Imperial Falcion (Custus Pattern) Mark I

Before the Shadowword, there was the Falcion. The Shadowword is a much more sophisticated piece of machinery, but the Falcion still has a place as a venerable old workhorse. Firing a solid shell in place of the massive energy discharge of the turbolaser, the Falcion lacks the massive strength of the Shadowword, but has a more powerful blast.

Custus Forgeworld was a small Forgeworld dedicated to manufacturing only the largest war machines before it was declared rogue and suffered the fate of exterminatus in 989M41. Custus produced the Falcion in large numbers prior to its destruction and because of that, a large number of Falcion's are still in service, their main gun being relatively easy to maintain compared to the more sophisticated turbolaser. However, they are rapidly falling out of favor and they replaced by Shadowwords as they are destroyed.

In this way, the Falcion is slowly going extinct..

Imperial Falcion					
	Points	BS	Armor		
			front	side	rear
Falcion	433	3(4)	14	13	12

Substitution: An Imperial Falcion may be taken instead of a Shadowword anyplace where a Shadowword is taken.

Type: Tracked, Lumbering

Structure: 3 structure points

Crew: 4 Guardsmen (Targeters)

Transport: None

Fire Points: None

Access Points: None

Options: None

Weapons:

Quake Cannon
 Heavy Bolter
 2x Lascannons
 7x bolters

Quake Cannon:

Range	Str	AP	Special
108"	8	3	Large Ordnance 1, Tank Hunter Blast, Titan Killer D3

Modeling: The Falcion is an OOP model originally produced by Armorcast.

SPECIAL RULES

Terrain: A 2nd Generation baneblade can ignore low walls, hedges, bushes, and rubble.

War Machine: As a war machine, instead of picking a target for the vehicle, pick a target for each of its weapons. Further, the 2nd generation baneblade may always fire all of its weapons and never counts as moving for the purposes of firing weapons.
