

Crom Pattern Land Raider

(Incomplete Model)

The Space Wolf Chapter reveres their Dreadnaughts as Great Warriors as well as Leaders. The oldest of which are known as Venerable Dreadnaughts and often lead their young brothers in battle. These warriors exert great presence on the battlefield and inspire their fellow wolves to great feats of heroism. However, these venerable leaders are often restricted to lumber across the battlefield and rarely experience the thrill of close quarters combat.

The Crom Pattern Land Raider harkens to an older day when Dreadnaughts could join their smaller brothers in tearing across the open battlefield in Rhino and Land Raider Transports to engage the enemy in the close fight. The Crom Pattern Land Raider expands the MKIV Land Raider Chassis and opens the troop compartment to accommodate the ceremite and steel monsters. This variant also drops some armor and weapon systems to accommodate the increased cargo requirement. Thus, the Crom Pattern Land Raider is the Venerable Dreadnaught's chariot to the close fight and enables the Dread's awesome power and leadership to lead from the front.

Crom Pattern Land Raider					
	Points	BS	Armor		
			front	side	rear
Crom	178	4	13	13	12

Substitution: A Crom Pattern Land Raider is a transport option for a venerable dreadnought and therefore may be taken as a transport option for a venerable dreadnought, wherever a venerable dreadnought may be taken.
